Package 'betaSandwich'

September 20, 2022

Title Robust Confidence Intervals for Standardized Regression Coefficients

Version 1.0.1

Description Generates robust confidence intervals for standardized regression coefficients using heteroskedasticity-consistent standard errors for models fitted by lm() as described in Dudgeon (2017) <doi:10.1007/s11336-017-9563-z>.

R topics documented:

`BetaHC` *Estimate Standardized Regression Coefficients and Robust Sampling Covariance Matrix*

Description

Estimate Standardized Regression Coefficients and Robust Sampling Covariance Matrix

Usage

```
BetaHC(object, type = "hc3", g1 = 1, g2 = 1.5, k = 0.7)
```

Arguments

`object`	Object of class `lm`.
`type`	Character string. Correction type. Possible values are `"hc0"`, `"hc1"`, `"hc2"`, `"hc3"`, `"hc4"`, `"hc4m"`, and `"hc5"`.
`g1`	Numeric. `g1` value for `type = "hc4m"` or `type = "hc5"`.
`g2`	Numeric. `g2` value for `type = "hc4m"`.
`k`	Numeric. Constant for `type = "hc5"`

Value

Returns an object of class `betaSandwich` which is a list with the following elements:

call Function call.

type Standard error type.

beta Vector of standardized slopes.

vcov Sampling covariance matrix of the standardized slopes.

n Sample size.

p Number of regressors.

df $n - p - 1$ degrees of freedom

Author(s)

Ivan Jacob Agaloos Pesigan

Other Beta Sandwich Functions: `BetaN()`

Examples

```
object <- lm(QUALITY ~ NARTIC + PCTGRT + PCTSUPP, data = nas1982)
std <- BetaHC(object)
# Methods ------------------------------------------------------
print(std)
summary(std)
coef(std)
vcov(std)
confint(std, level = 0.95)
```

`BetaN` *Estimate Standardized Regression Coefficients and Sampling Covariance Matrix Assuming Multivariate Normality*

Description

Estimate Standardized Regression Coefficients and Sampling Covariance Matrix Assuming Multivariate Normality

Usage

```
BetaN(object)
```

Arguments

`object`	Object of class `lm`.

Value

Returns an object of class `betaSandwich` which is a list with the following elements:

call Function call.

type Standard error type.

beta Vector of standardized slopes.

vcov Sampling covariance matrix of the standardized slopes.

n Sample size.

p Number of regressors.

df $n - p - 1$ degrees of freedom

coef.betaSandwich *Standardized Regression Slopes*

Description

Standardized Regression Slopes

Usage

```
## S3 method for class 'betaSandwich'
coef(object, ...)
```

Arguments

object	Object of class betaSandwich.
...	additional arguments.

Value

Returns a vector of standardized regression slopes.

Author(s)

Ivan Jacob Agaloos Pesigan

Examples

```
object <- lm(QUALITY ~ NARTIC + PCTGRT + PCTSUPP, data = nas1982)
std <- BetaHC(object)
coef(std)
```

confint.betaSandwich *Robust Confidence Intervals for Standardized Regression Slopes*

Description

Robust Confidence Intervals for Standardized Regression Slopes

Usage

```
## S3 method for class 'betaSandwich'
confint(object, parm = NULL, level = 0.95, ...)
```

Arguments

object	Object of class betaSandwich.
parm	a specification of which parameters are to be given confidence intervals, either a vector of numbers or a vector of names. If missing, all parameters are considered.
level	the confidence level required.
...	additional arguments.

Value

Returns a matrix of confidence intervals.

Author(s)

Ivan Jacob Agaloos Pesigan

Examples

```
object <- lm(QUALITY ~ NARTIC + PCTGRT + PCTSUPP, data = nas1982)
std <- BetaHC(object)
confint(std, level = 0.95)
```

nas1982 *1982 National Academy of Sciences Doctoral Programs Data*

Description

1982 National Academy of Sciences Doctoral Programs Data

Usage

```
nas1982
```

Format

Ratings of 46 doctoral programs in psychology in the USA with the following variables:

QUALITY Program quality ratings.

NFACUL Number of faculty members in the program.

NGRADS Number of program graduates.

PCTSUPP Percentage of program graduates who received support.

PCTGRT Percent of faculty members holding research grants.

NARTIC Number of published articles attributed to program faculty member.

PCTPUB Percent of faculty with one or more published article.

`print.betaSandwich` *Print Method for an Object of Class betaSandwich*

Description

Print Method for an Object of Class betaSandwich

Usage

```
## S3 method for class 'betaSandwich'
print(x, alpha = c(0.05, 0.01, 0.001), digits = 4, ...)
```

Arguments

`x`	Object of class `betaSandwich`.
`alpha`	Significance level.
`digits`	Digits to print.
`...`	additional arguments.

Value

Returns a matrix of standardized regression slopes, standard errors, test statistics, p-values, and confidence intervals.

Author(s)

Ivan Jacob Agaloos Pesigan

Examples

```
object <- lm(QUALITY ~ NARTIC + PCTGRT + PCTSUPP, data = nas1982)
std <- BetaHC(object)
print(std)
```

---

summary.betaSandwich *Summary of the Results of BetaHC*

Description

Summary of the Results of BetaHC

Usage

```
## S3 method for class 'betaSandwich'
summary(object, alpha = c(0.05, 0.01, 0.001), digits = 4, ...)
```

Arguments

object	Object of class betaSandwich.
alpha	Significance level.
digits	Digits to print.
...	additional arguments.

Value

Returns a matrix of standardized regression slopes, standard errors, test statistics, p-values, and confidence intervals.

Author(s)

Ivan Jacob Agaloos Pesigan

Examples

```
object <- lm(QUALITY ~ NARTIC + PCTGRT + PCTSUPP, data = nas1982)
std <- BetaHC(object)
summary(std)
```

`vcov.betaSandwich` *Robust Sampling Covariance Matrix of the Standardized Regression Slopes*

Description

Robust Sampling Covariance Matrix of the Standardized Regression Slopes

Usage

```
## S3 method for class 'betaSandwich'
vcov(object, ...)
```

Arguments

`object`	Object of class `betaSandwich`.
`...`	additional arguments.

Value

Returns a matrix of variance-covariance matrix of standardized slopes.

Author(s)

Ivan Jacob Agaloos Pesigan

Examples

```
object <- lm(QUALITY ~ NARTIC + PCTGRT + PCTSUPP, data = nas1982)
std <- BetaHC(object)
vcov(std)
```
