

betaSandwich: Robust Confidence Intervals for Standardized Regression Coefficients

Ivan Jacob Agaloos Pesigan

Description

Generates robust confidence intervals for standardized regression coefficients using heteroskedasticity-consistent standard errors for models fitted by `lm()` as described in Dudgeon (2017). A description of the package and code examples are presented in Pesigan et al. (2023).

Installation

You can install the CRAN release of `betaSandwich` with:

```
install.packages("betaSandwich")
```

You can install the development version of `betaSandwich` from [GitHub](#) with:

```
if (!require("remotes")) install.packages("remotes")
remotes::install_github("jeksterslab/betaSandwich")
```

More Information

See [GitHub Pages](#) for package documentation.
